While every effort has been made to ensure the program's security and functionality, the developer(s) disclaim any liability for damages or misuse of the program.

Step Nr.1

Extract file in a new folder.

Comment:

do not open within teams, do not
start exe from zip.
EXTRACT first!!!

Step Nr.2

Open ClassEditor.exe

Comment:

Open after extraction!!! -_-

Step Nr.3

Go to your weekly schedule and download it!

The screenshot shows the Viona24 website interface. On the left, there's a sidebar with the Viona24 logo and a search bar. Below the search bar, there are filters for calendar weeks: "alle", "KW48", and "KW49". The main content area displays a grid of weekly schedules for Monday through Thursday, with time slots from 8:00 to 15:00. A small thumbnail of the schedule is visible in the top left of the main area.

Step Nr.4

Save in ClassEditor Folder.

Comment:

You can save where ever you want,
dont complain if you can't find it!!!

Step Nr.5

1. Run ClassEditor.exe
2. Select pdf file window will open.
3. Select pdf file that you downloaded.

Comment:
Program will open and edit only pdf files
from our class schedules.

No it wont open your grandmas cooking
recipes.

Step Nr.6

You will see your class list that you can edit.
Click on thema that you want to edit and write new thema in where „Python program“ is located.

Comment:
Edit select class: window will be empty so write down your own thema.

For example „Feeding Chickens“

The screenshot shows a window titled "ClassEditor" with standard Windows window controls (minimize, maximize, close). The main content area is titled "Available Class Information:" and contains a list of class entries. The first entry, "Montag: FIAE-AnwP-Entwickeln / [redacted]", is highlighted with a blue background. Below this list, there is a section titled "Edit Selected Class:" which includes a text input field containing "Python program". Underneath the input field are two buttons: "Update Selected Classes" and "Update All Classes". At the bottom of the window, there is a "Save PDF Document" button and a checkbox labeled "Digital(No Signature)".

Available Class Information:	
Montag: FIAE-AnwP-Entwickeln /	[redacted]
Montag: FI-ITS-CySy /	[redacted]
Montag: ITS-Net-Lin /	[redacted]
Montag: FI-ITS-CySy /	[redacted]
Dienstag: FIAE-AnwP-Entwickeln /	[redacted]
Dienstag: ITT-PC /	[redacted]
Dienstag: ITS-Net-Lin /	[redacted]
Dienstag: FIAE-AnwP-Entwickeln /	[redacted]
Mittwoch: FIAE-AnwP-Entwickeln /	[redacted]
Mittwoch: ITT-PC /	[redacted]

Edit Selected Class:

Python program

Update Selected Classes

Update All Classes

Save PDF Document ☐ Digital(No Signature)

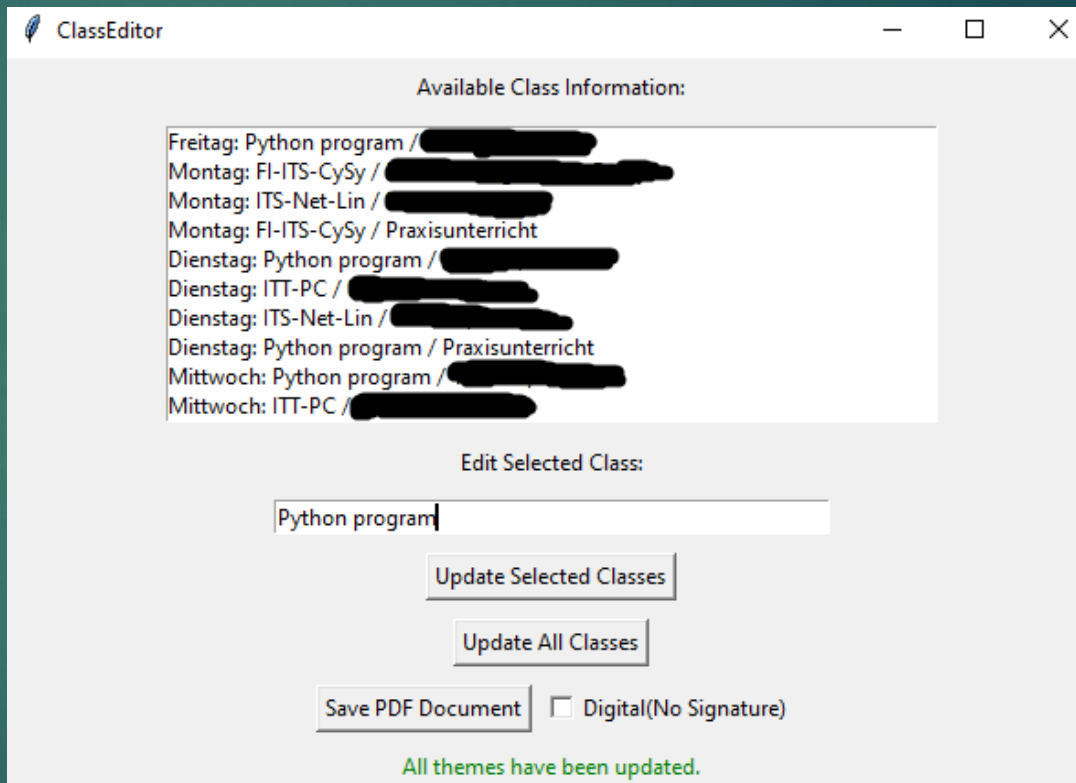

Step Nr.7

After pressing button

„Update Selected Classes“
your old selected themas will be updated to new ones as in this picture class 1,5,8,9 has been updated.

Comment:

All themas with the same prefix will be updated, Praxisunterricht takes a random thema from the same day!

The screenshot shows a window titled "ClassEditor" with standard Windows window controls. Inside the window, there is a section titled "Available Class Information:" containing a list of class entries. Each entry consists of a day of the week, a subject, and a redacted name. The entries are: Freitag: Python program / [redacted], Montag: FI-ITS-CySy / [redacted], Montag: ITS-Net-Lin / [redacted], Montag: FI-ITS-CySy / Praxisunterricht, Dienstag: Python program / [redacted], Dienstag: ITT-PC / [redacted], Dienstag: ITS-Net-Lin / [redacted], Dienstag: Python program / Praxisunterricht, Mittwoch: Python program / [redacted], and Mittwoch: ITT-PC / [redacted]. Below this list is a section titled "Edit Selected Class:" with a text input field containing "Python program". Underneath the input field are two buttons: "Update Selected Classes" and "Update All Classes". At the bottom of the window, there is a "Save PDF Document" button and a checkbox labeled "Digital (No Signature)". A green status message at the very bottom reads "All themes have been updated."

ClassEditor

Available Class Information:

- Freitag: Python program / [redacted]
- Montag: FI-ITS-CySy / [redacted]
- Montag: ITS-Net-Lin / [redacted]
- Montag: FI-ITS-CySy / Praxisunterricht
- Dienstag: Python program / [redacted]
- Dienstag: ITT-PC / [redacted]
- Dienstag: ITS-Net-Lin / [redacted]
- Dienstag: Python program / Praxisunterricht
- Mittwoch: Python program / [redacted]
- Mittwoch: ITT-PC / [redacted]

Edit Selected Class:

Python program

Update Selected Classes

Update All Classes

Save PDF Document ☐ Digital (No Signature)

All themes have been updated.

Step Nr.8

After pressing button

„Update All Classes“
all your old themas will be updated
to new ones that you updated
previously (saved in json file).
Comment:

If you delete json file then update all
button doesnt do anything, it
updates only if you have updated
selected classes again, then new
json file is created with saved
themas.

The screenshot shows a window titled "ClassEditor" with standard Windows window controls. Inside the window, there is a section titled "Available Class Information:" containing a list of class entries, each with a day, a subject, and a redacted name. The entries are: Freitag: Python program / [redacted], Montag: FI-ITS-CySy / [redacted], Montag: ITS-Net-Lin / [redacted], Montag: FI-ITS-CySy / Praxisunterricht, Dienstag: Python program / [redacted], Dienstag: ITT-PC / [redacted], Dienstag: ITS-Net-Lin / [redacted], Dienstag: Python program / Praxisunterricht, Mittwoch: Python program / [redacted], and Mittwoch: ITT-PC / [redacted]. Below this list is a section titled "Edit Selected Class:" with a text input field containing "Python program". Underneath the input field are three buttons: "Update Selected Classes", "Update All Classes", and "Save PDF Document". To the right of the "Save PDF Document" button is a checkbox labeled "Digital(No Signature)". At the bottom of the window, a green status message reads "Document saved as PDF: Weekly_Class_Schedules_49.pdf".

ClassEditor

Available Class Information:

- Freitag: Python program / [redacted]
- Montag: FI-ITS-CySy / [redacted]
- Montag: ITS-Net-Lin / [redacted]
- Montag: FI-ITS-CySy / Praxisunterricht
- Dienstag: Python program / [redacted]
- Dienstag: ITT-PC / [redacted]
- Dienstag: ITS-Net-Lin / [redacted]
- Dienstag: Python program / Praxisunterricht
- Mittwoch: Python program / [redacted]
- Mittwoch: ITT-PC / [redacted]

Edit Selected Class:

Python program

Update Selected Classes

Update All Classes

Save PDF Document ☐ Digital(No Signature)

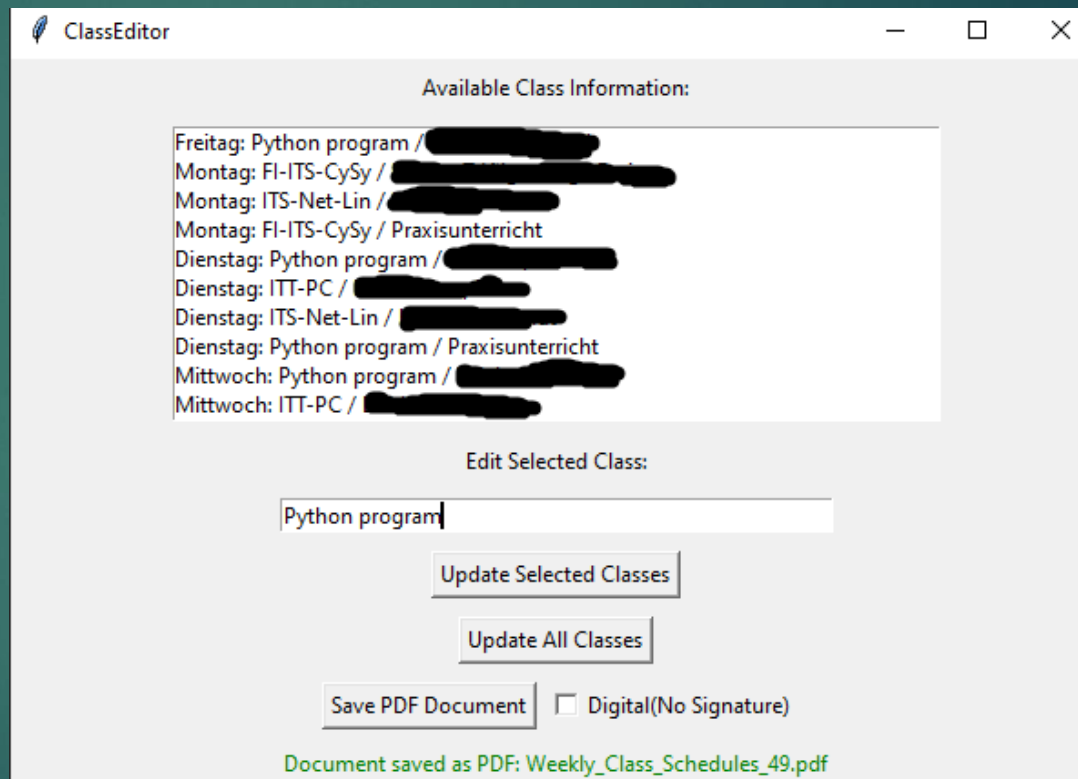

Document saved as PDF: Weekly_Class_Schedules_49.pdf

Step Nr.9

Press button
„Save PDF Document“

And program will update docx and
pdf file and save in the same
location as ClassEditor.exe

Comment:
Check in checkbox if you need
digital version of this file, meaning no
signature data and line.

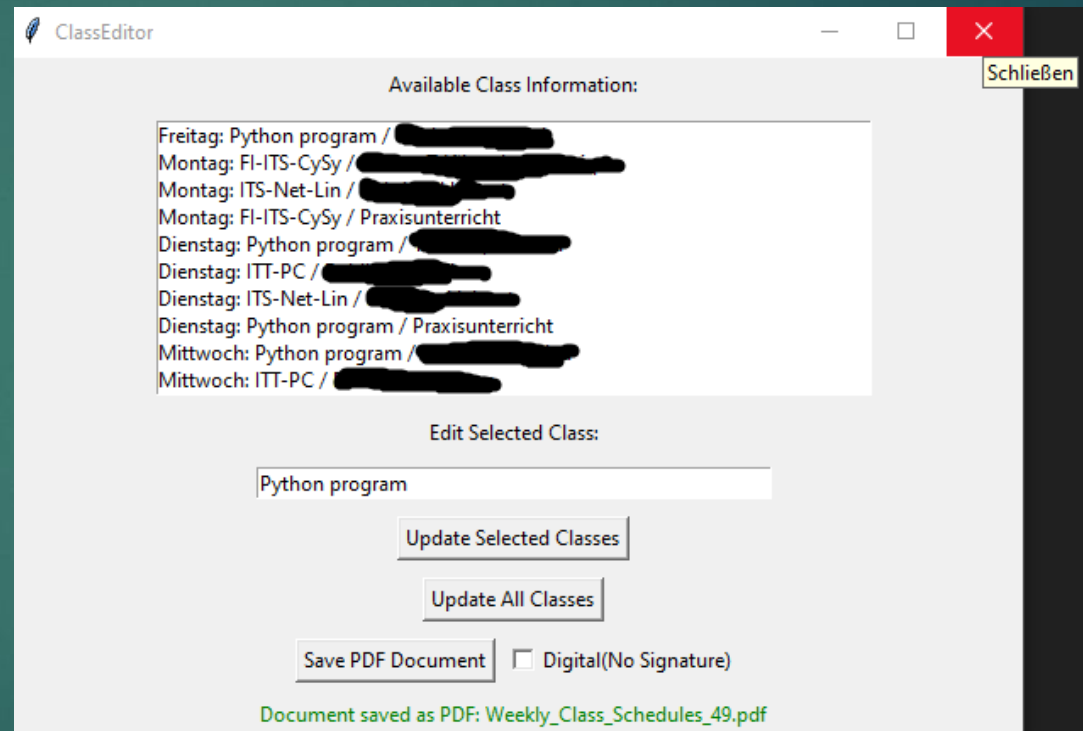

Step Nr.10

After files have been created and saved, you can close the program and it will clean up the files that are not needed anymore.

Comment:

Program is ready to be closed when you see green text at the bottom of program window.

„Document saved as PDF“

Step Nr.11

Two files will be created.
PDF- one that is done and don't need editing.
DOCX- one that you can edit as you wish.
